**Hydra•30 *Plus***<sup>™</sup>

**CREATE UNIFORM HYDRATION**

Decreases water usage

Combats turf stress and supports recovery

Restores hydration uniformity across a variety of soil types

## HYDRA 30<sup>PLUS</sup>

### Create uniform hydration

Hydra 30<sup>Plus</sup> is formulated to allow turf managers the ability to improve the overall moisture management within agronomic programs. Hydra 30<sup>Plus</sup> improves overall root zone moisture by restoring uniform hydration throughout the root zone across a variety of soil types. To better handle the stresses of modern maintenance practices, Hydra 30<sup>Plus</sup> also contains a vitamin package to aid turf in combating stress and help speed recovery when stress is evident. Hydra 30<sup>Plus</sup> provides the turf manager with application flexibility, visual results, and cost effectiveness while achieving firm turfgrass surfaces.

#### PRODUCT DETAILS

- Restores hydration uniformity across a variety of soil types.
- Provides a key vitamin package.
- Combats turf stress and aids in recovery.
- Increases infiltration.
- Decreases water usage.
- Proves to be an economical solution.
